Technical Skills

Programming Languages: C, C++, Java, Python, HTML, CSS, SASS, Bootstrap, TailwindCSS, JavaScript, jQuery, Embedded JavaScript (EJS), React.js, Express.js, Node,js, Redux
Tools: VS Code, Git, GitHub
Database: MySQL, MongoDB

Experience

Hacktoberfest 2023   October 2023
Open Source Contributor   *Mumbai, India*
- Spearheaded contributions to diverse open-source projects, focusing on Front-end development and data structures, showcasing expertise in HTML, CSS, C, C++, Java, Data Structures, Algorithms, Git, and GitHub
- Demonstrated proficiency and collaborative skills by successfully merging 4 pull requests, contributing significantly to the success of the project

Education

Vivekanand Education Society's Institute of Technology   March 2026
Bachelor of Engineering in Information Technology; CGPA: 9.12 (till sem3)   *Mumbai, India*

Lakshya Prep High School and Jr. College   March 2022
XII (HSC); 85.50%   *Thane, India*

Projects

FoodVista | [GITHUB LINK] | *React.js, Tailwind CSS, Redux Toolkit*   April 2024
- Designed a web app for food browsing and ordering, achieving an initial page load time of 35ms
- Implemented a custom hook for online/offline status monitoring, enhancing user experience and functionality
- Incorporated lazy loading, bundling, and Redux Toolkit for cart management, along with error handling and a Shimmer UI for loading states, ensuring a smooth and intuitive interface

InvestHub - Stock Market Analysis | [GITHUB LINK] | *Python, Tkinter, MySQL*   April 2024
- Accomplished the development of a user-friendly interface with features such as stock analysis, charting, comparison, news reading, educational content access, interactive games, note-taking, and notification alerts
- Leveraged MySQL for robust backend management, efficiently storing user data and stock information
- Teamed up with a group of 4 to analyze and process a historical dataset from 2010 to 2023

YT Duration Tracker | [GITHUB LINK] | *React.js, SASS, API*   January 2024
- Developed a web application using React, Vite, and Axios, enabling users to analyze YouTube playlists effortlessly
- Streamlined features, providing vital metrics including video count, total duration and YouTuber details, upon pasting the playlist link, saving users 15+ minutes
- Deployed Webpack for efficient module bundling and optimization, enhancing the performance of the application

UniFind - College recommendation portal | [GITHUB LINK] | *Java, MySQL*   October 2023
- Established an innovative platform guiding international master's program applicants in discovering ideal colleges
- Elevated user satisfaction with the integration of filters, enhancing search efficiency and reducing college research time from 15 days to 2 days
- Collaborated with a team of 4 to successfully launch and refine the application, demonstrating flexibility and attention to detail in managing and processing data from a diverse dataset of 100 colleges

Certificates

MERN Stack Web Development   December 2023
Tutedude

Postman API Fundamental   October 2023
Postman

SQL (Basic)   October 2023
HackerRank

Additional

Languages: Fluent in English, Hindi and Marathi; Elementary Proficiency in German
Additional: Actively engaged in **Smart India Hackathon, Code with Maps Hackathon, Space Hackathon 2023, Google Solution Challenge 2024**, showcasing dedication to solving real-world challenges through technology
